THIS IS UNEVALUATED INFORMATION

50X1-HUM

The direction finding station near Jasnitz, Austria, is a tentlike, four-cornered installation. The canvas covering is held up by iron and bamboo supports. In the middle of the roof a long antenna projects out. Wires go from the antenna to the ground. Near the tent is an installation for the generation of current. The officers and maintenance crew stay mostly in the tent. In front of the tent and in the surrounding area are Russian guards who let no one in. The radio car is usually near the generator. Work is carried on there day and night without stop.
